

Gk and Current Affairs
Class-VII PA I

Landforms and water bodies

Bay

A bay is a recessed, coastal body of water that directly connects to a larger main body of water, such as an ocean, a lake.

Gulf

A gulf is a large inlet of the ocean that is deeply indented into land, often possessing a narrow opening.

Strait

A strait is a narrow, natural waterway that connects two larger bodies of water, such as two seas or an ocean and a sea.

Isthmus

A narrow strip of land connecting two larger land areas.

Estuary

Where freshwater rivers meet the ocean.

Cape

A narrow piece of land extending into a body of water.
