

Gk Update (2025-26)

Class VI

First Periodic

Here are 20 facts about space:

1. There are more stars than grains of sand on Earth.
2. The universe is expanding.
3. The Sun is a star, not just a giant light in the sky.
4. Our solar system is located within the Milky Way galaxy.
5. One day on Venus is longer than a year on Earth.
6. Space is silent because there's no air for sound to travel through.
7. Jupiter has a giant storm called the Great Red Spot that's been raging for hundreds of years.
8. Saturn has beautiful rings made of ice and rock.
9. The International Space Station orbits Earth in about 90 minutes.
10. There are trillions of galaxies in the observable universe.

11. Uranus spins sideways.
12. Jupiter's moon Io has active volcanoes.
13. Mars has a volcano larger than the state of Hawaii.
14. The observable universe is about 93 billion light-years in diameter.
15. The average temperature of space is about -270.45 Celsius.
16. Dark matter and dark energy make up a significant portion of the universe.
17. Neutron stars are incredibly dense, even smaller than a city on Earth.
18. The Hercules-Corona Borealis Great Wall is the largest known structure in the universe.
19. Quasars are incredibly bright and powerful objects in the universe.
20. A massive water reservoir has been discovered in space, larger than all the oceans on Earth combined.
